

Ubichem Research acquisition to enable further growth of Pharma Services business

The majority share of Ubichem Research Ltd has been acquired by financial investment company Lochlomond Holding Limited, owned by Marton Szoke, and Ubichem Research is now independent of Ubichem Plc in the UK. The remaining minority share remains in the ownership of József Répási, Managing Director of Ubichem Research Ltd. This will facilitate ambitious plans for further growth of our business, and help us to provide an even better service to our customers.

Ubichem Pharma Services will continue to support the drug development programs of its pharma and biotech clients worldwide, from discovery through the clinic:

- Expertise in heterocyclic chemistry has enabled a catalogue of functionalised building blocks for use in medicinal chemistry projects to grow significantly over the last year. Visit www.ubichemdirect.com to search this catalogue, or access it through our website.
- An experienced team of chemists offer custom synthesis and lead optimisation services, backed up by good in-house analytical capabilities.
- A strong focus on process R&D enables smooth scale-up in manufacturing APIs and intermediates.
- Recent regulatory approval for the supply of cGMP radiolabelled Active Pharmaceutical Ingredients (APIs) built on the approval we obtained previously for the commercial supply of cGMP APIs.

If we have a CDA/NDA or MSA in place with your company, we will shortly contact the appropriate people regarding re-assigning or updating such documents.

We look forward to providing an even better service to those of you we are already working with. For those of you who we aren't, yet, why not visit our new website at www.ubichempharma.com or use the contact details below to learn more about how we can support your development programs.
